DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Uesugi (6,038,264).

Regarding claims 1 and 5, Uesugi, as shown in figures 7-12, teaches digital receiving apparatus and method comprising receiving portion (78, 23-30, 35-38, 40-43, 178, 123-130; 135-138, 140-134) for distributing and demodulating the received signal into plurality of data streams on each of said two channels and switching portion (54) for selectively producing said plurality of data streams. See also column 8, line 60 to column 11, line 30.

Allowable Subject Matter

3. Claims 2-4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Mojoli et al (4,615,040) and Rog et al (6,480,557) are cited because they are pertinent to the digital receiving method and apparatus. However, none of the cited references teaches the further arrangements of the switching functions as recited in claims 2-4 and 6.
